

Emmil Franz M. Consignado

Las Pinas City | 09766566775 | consignadofranz@gmail.com

PROFESSIONAL SUMMARY

BSIT graduate with internship experience in Controls Assurance, gaining practical exposure to IT controls, risk and compliance, data privacy, business process review, and documentation and evidence assessment. Developed a technical foundation in programming, databases, networking, and web development through academic training and a full-stack capstone project. Interested in building a career in cybersecurity, with particular interest in risk, compliance, governance, information security, and GRC, while continuously developing technical cybersecurity knowledge and skills. Currently preparing for the SC2 Certified in Cybersecurity (CC) examination.

INTERNSHIP EXPERIENCE

Controls Assurance Intern

Deloitte Philippines | March 2026 — June 2026

- Supported **Controls Assurance and Risk Advisory engagements** through documentation review, data organization, Excel-based reporting, and engagement tracking.
- Reviewed client documentation and supporting evidence for **completeness, accuracy, consistency, and compliance** with established engagement requirements
- Assisted in evaluating documentation against **IT control testing criteria**, including considerations based on **COBIT 2019** and applicable **Bangko Sentral Ng Pilipinas (BSP) guidelines**
- Reviewed business process information to identify whether **Personally Identifiable Information (PII)** was present, appropriate for the process, and handled in accordance with applicable data privacy requirements.
- Documented observations and engagement information that could support the identification and communication of control gaps, risks, or findings.
- Prepared Minutes of Meeting (MoM) and maintained organized engagement documentation to support project activities.

ACADEMIC PROJECT

Full-Stack Developer — KayLyz Water Station Ordering & Scheduling System

Academic Capstone Project | Client-based web application

- Developed a web-based water ordering and delivery scheduling system as part of a team-based academic capstone project.
- Contributed across frontend, backend, and database-connected components using JavaScript, Node.js, Express.js, and MongoDB (NoSQL).
- Implemented three user roles—Ad min, Super Admin, and Customer—with role-based permissions for operational and system functions.
- Used Socket.IO to support real-time notifications and implemented a **simulated online-payment workflow** for project demonstration purposes.
- The application was deployed and publicly searchable during the project period using a **.shop domain**; the hosting subscription has since ended.

EDUCATION

Bachelor of Science in Information Technology

STI College Las Piñas | 2022-2026

TECHNICAL SKILLS

• Cybersecurity

- Cybersecurity Fundamentals
- Network Security
- Security Awareness
- Data Privacy
- Basic Networking

• GRC / Risk / Compliance

- IT Controls
- Controls Testing
- Risk Assessment
- Risk Assurance
- GRC
- IT Governance
- Compliance
- Documentation
- Evidence Review

• Frameworks & Guidelines

- COBIT 2019
- Bangko Sentral ng Pilipinas (BSP) Guidelines

• Programming Languages/ Databases

- Python
- Java
- MongoDB (NoSQL)
- HTML/CSS

- JavaScript
- C#
- SQL

- **Tools & Platforms**

- Microsoft Excel
- JavaScript
- Hostinger
- Visual Studio
- Visual Studio Code
- Unity
